Languages: Java, C, Python, JavaScript, TypeScript, HTML, CSS

Web: React, React Native, Node.js, Express.js, MongoDB, Flask, SQLAlchemy, Tailwind CSS, Bootstrap

Systems & DevOps: Linux, Docker, AWS, Cloudflare, GitHub Actions, PowerShell

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, WebStorm, Postman

WORK EXPERIENCE

FULL STACK SOFTWARE ENGINEER

Remote

Y STEM AND CHESS INC.

Jun 2026 – Aug 2026

- Deployed and configured a self-hosted Probo GRC environment on Ubuntu Server using Docker Compose, managing container networking, persistent storage, environment variables, secrets, SeaweedFS, and external service dependencies.
- Diagnosed container startup failures, configuration issues, API dependencies, and resource constraints while evaluating Probo, AuditKit, and Eramba for the organization's SOC 2/GRC initiative.
- Contributed React/TypeScript fixes involving game-saving, application state, and socket handling; reviewed and merged production changes through GitHub pull-request workflows.

TEACHING ASSISTANT

Bloomington, IN

Indiana University (E111 / C291)

Jan 2026–May 2026

- Mentored 50+ students in C programming, computer structures, and data structures for C291/E111.
- Reviewed and debugged student code involving pointers, memory management, and algorithmic issues.
- Explained low-level computing concepts and programming techniques through individual and group instruction.

DIGITAL PERSONAL SHOPPER

Brownsburg, IN

Walmart

Jan 2026–May 2026

- Use enterprise inventory and fulfillment systems to process digital orders in a high-volume environment.
- Collaborate with team members on routing, staging, and fulfillment workflows while consistently exceeding hourly performance targets by 10–15%.
- Resolve real-time inventory and order discrepancies while maintaining fulfillment accuracy under strict deadlines.
- Maintain a 4.34/5 associate interaction rating, reflecting strong customer service, communication, and responsiveness in a fast-paced environment.

TECHINICAL PROJECTS

THINKBOARD

JavaScript, React, Node.js, Express.js

- Built a full-stack web application with separate frontend and backend services, implementing client-server communication through REST APIs.
- Developed application functionality across the React frontend and Node/Express backend using Git for version control.

REST FLASK API

Python, Flask, SQLAlchemy, SQLite, Postman

- Built a CRUD REST API using Flask and SQLAlchemy ORM with SQLite for persistent relational data.
- Designed RESTful endpoints and database models and validated API functionality using Postman.

CERTIFICATIONS

Datacom Introduction to Cloud Job Simulation — Forage

Feb 2026

Technical Certificate in Software Development — Ivy Tech Community College

Dec 2024

Certificate in Software Application Developer — Ivy Tech Community College

Jul 2024

Java Foundations Certified Junior Associate — Oracle

Dec 2023
